-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 August 2003 and on 17 June 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Claims 1-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on June 17, 2005.

Claim Objections

2. Claim 14 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 14, which depends on claim 11, recites the limitations of claim 12 (which also depends on claim 11) verbatim.

3. Claims 12, 14, 15 and 23-25 are objected to because of the following informalities:

- 1) In the first line of claims 12, 14 and 15: The term "member" should be changed to --blank--.
- 2) In the second line of claim 15: The term "member" should be changed to --layer--.
- 3) In the third line of claims 23 and 25: The term --of-- should be inserted after "attaching".

Art Unit: 3673

- 4) In the first line of claim 24: The term --of-- should be inserted after the term “cutting”.
- 5) In the second line of claim 24: The phrase --of the unitary pan and gasket member-- should be inserted after the term “edges”.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 10 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 5,529,313 to Malks. Malks '313 shows the claimed limitations of a faceplate subassembly comprising a pan blank (14) of a first predetermined configuration; a gasket blank (10) of a second predetermined configuration; and the pan blank attached to the gasket blank such that upon trimming the subassembly into a third predetermined configuration (as described in column 3, lines 13-15 and in column 4, lines 4-6), different than the first predetermined configuration and the second predetermined configuration, the peripheral edges of the gasket blank are substantially coincident with the peripheral edges of the pan blank.

Allowable Subject Matter

6. Claims 11-16 and 18-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The examiner respectfully asserts that one of ordinary skill in the art would not have found it obvious at the time the invention was made to attach the respective pan and gasket blanks of Mals '313 together through the use of an adhesive as recited in claims 11-16 and 18-25 since the pan and gasket blanks are disclosed as being connected in a conventional manner through the use of bolts as shown in Figure 1 and as described in column 3, lines 15-19 of Mals '313.

Conclusion

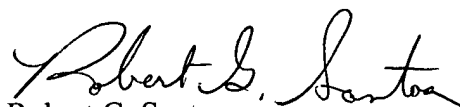

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jeffries '344, Johnson '989, Dowd et al. '083, Schoenborn '691, Adkins '413, Farnam '480, Pommier '889, Farnam '218, Farnam '036 and Farnam '401.
